

Year 11 Geography; Autumn PPE Checklist 2024

Students will sit a full paper 1 exam; this will last 1hr 30 mins.

The Challenge of Natural Hazards:

- The location of tectonic activity.
- Types of plate boundaries and the hazards they create.
- Changes to global climate.
- Evidence for climate change.
- The causes of climate change.
- Formation of tropical storms.
- The effects of tropical storms (**Case study: Typhoon Haiyan**)

The Living World:

- Distribution of tropical rainforests.
- How the GAC affects climate.
- Causes and effects of deforestation.
- Managing the tropical rainforest.
- Human activity in hot deserts (**Case study: Thar Desert**)

UK Physical Landscapes – Coasts:

- Recognising features on an OS map.
- The formation of headlands and bays.
- Managing the coast through hard and soft engineering.

UK Physical Landscapes – Rivers:

- Features along a river.
- Recognising features on an OS map.
- Features and formation of meanders.
- Causes of flooding.

Key skills assessed; measuring distance on a map, describing patterns on maps, reading from graphs and maps, 4 and 6 figure grid references, recognising features on an OS map.

Key areas I need to focus on are:
